Natural Avalanche in Pinnacles, Bridger Range

Saddle Peak
Bridger Range
2/4/2020
Code
SS-N
Aspect
E
Latitude
45.79430
Longitude
-110.93600
Notes
"I took this photo from the highway today just before noon 2/4/20. Looked pretty fresh and not blown in much and the winds were howling. Largest part of the crown looked 6-8' tall right in the center. It connected across a pretty low angle shoulder to pull out the northern bowl."
Number of slides
1
