Skier Triggered Avalanche Mount Blackmore - East Face

Mt Blackmore
Northern Gallatin
12/28/2020
Code
SS-ASu-R1-D1-O
Elevation
9500
Aspect
E
Latitude
45.44460
Longitude
-111.00000
Notes

From obs: "Skier Triggered a 1.5' slide to his right while making a turn near a cliff band. The slide did not intersect with the skier's path. We did a ECT before choosing our line and were not able to get the soft slab, or anything else to propagate, but clearly, the slab is ready to go as it slid on rocks. We both skied out without incident."

Number of slides
1
Number caught
0
Number buried
0
Avalanche Type
Soft slab avalanche
Trigger
Skier
Trigger Modifier
u-An unintentional release
R size
1
D size
1
Bed Surface
O - Old snow
Problem Type
Persistent Weak Layer
