Many natural avalanches on Buck Ridge

Buck Ridge
Northern Madison
2/8/2021
Code
SS-N
Latitude
45.17190
Longitude
-111.38000
Notes

We (GNFAC) observed many (6+) natural avalanches while riding on Buck Ridge. Many looked to be breaking under the storm snow (3+feet; 2.7" SWE), but some looked deeper. We deduced that these ran on Monday, 8 February, because there was only a few inches of snow covering the debris.
