Natural avalanches on Saddle Peak, Argentina Bowl and Pinnacles

Saddle Peak
Bridger Range
2/17/2022
Code
L-N-R1-D1-S
Elevation
8600
Aspect
E
Latitude
45.79430
Longitude
-110.93600
Notes

From email: "Saw several recent avalanches on the east side of Saddle Peak on my drive up to Bridger this morning. All looked like naturals, I'd guess most were size R1D1 and one R1D2."

GNFAC forecasters saw the same slides which looked to involve the new snow. Most were R1-D1 dry loose and cornice falls, and there was one R1-D2 in Argentina Bowl that was likely a storm slab.

Number caught
0
Number buried
0
Avalanche Type
Loose-snow avalanche
Trigger
Natural trigger
R size
1
D size
1
Bed Surface
S - Avalanche released within new snow
Problem Type
New Snow
Vertical Fall
600ft
Slab Thickness units
centimeters
Single / Multiple / Red Flag
Multiple Avalanches
Advisory Year
21-22
