Widespread Instability in Southern Madisons

Date
Sat, 12/09/2023 - 14:40
Activity
Skiing

Starting around 7500’ on E,S,W aspects we found extensive cracking and wumphing on faceting at the ground layer. Felt wumphs every few steps and had around 30 foot shooting cracks in meadows and on ridgelines. Total snow depth was never more than 45cm

Region
Southern Madison
Location (from list)
Kirkwood Ridge
