# Natural Avalanche off Blackmore Trail

Date
Wed, 02/28/2024 - 11:10
Activity
Skiing

From IG: This avalanche was from this morning (02/28). It was windy and the gully was likely wind-loaded. One video shows the debris and crown. The pin on the map (below) shows the location of the debris.

Region
Northern Gallatin
Location (from list)
Mt Blackmore
