Storm slab avalanches at Bridger Bowl

Date
Thu, 05/23/2024 - 11:00
Activity
Skiing

Toured to the top of PK during today’s storm. Snow was very wet and heavy. We saw no other slides or signs of instability on the way up. Coming down skiers right of flippers, all 3 of us caused small slides and cracking within the new snow. I triggered the largest slide, which was 6-8” deep and 12’ wide.

Region
Bridger Range
Location (from list)
Bridger Bowl
Observer Name
Taylor Jordan
