# Wet snow avalanches at Bridger

Date
Wed, 04/26/2023 - 02:15
Activity
Skiing

Yesterday 4/25, Walked to the top of Pierre's Knob. The snow was unconsolidated mush, very sticky skiing. While hanging out at the top shack I heard 3 large avalanches running in the south bowl, white out conditions so was unable to see how big the slides were they sounded like they ran a long ways.

Region
Bridger Range
Location (from list)
Bridger Bowl
Observer Name
Bryon Aas
