Wind slabs in Frazier

Date
Tue, 03/26/2024 - 11:25
Activity
Skiing

Skied into Frazier basin today. Triggered a few small windslabs and saw a lot of cracking on NW aspects. All windslabs were still small breaking a few inches deep 10-15 feet wide and only running short distances in steep terrain. Winds were strong from the NE all morning and still blowing hard and continuing to load slopes when we left at 12:30.

Region
Bridger Range
Location (from list)
Frazier Basin
Observer Name
Charlie Bayles
