

Natural avalanahce (and collapsing) Specimen Creek

Specimen Creek
Southern Madison

2/7/2021

Code

N-R4-D2

Elevation

8500

Aspect

SW

Latitude

45.02650

Longitude

-111.04800

Notes

From obs: "GNFAC, You're never going to believe this, but there was tons of whumphing up in Specimen Creek today! There were a few avalanche classes there digging snow pits and getting unstable test results by the sounds of it. We saw a good sized natural on a steep SW facing meadow around 8500', probably would call it R4D2 but it was hard to get a good look through the storm."
