Maid of the mist/Fat maid

Date Sun, 01/16/2022 - 12:50 Activity Skiing

Skied up in the Maid of the Mist basin today. Dug a pit on a 24 deg, NNW facing slope just lookers right of the bottom of the Fat Maid. HS 135cm, had a CT10 RP @ 112cm followed by ECTN9 on the same layer. Facets at the ground were 4F+ and quite cohesive. Skied the Fat Maid, didn't see any signs of instability all day.

Region Northern Gallatin Location (from list) Maid of the Mist Observer Name Mike Lavery
