

East Face Argentina Bowl

Date

Mon, 01/17/2022 - 14:00

Activity

Skiing

Skied the center of the east face in Argentina bowl. The snow on the steeps was full depth facets and we were skimming rocks in our turns and creating small sluffs. No slab present. The conditions quickly transitioned to a more consolidated snowpack as the slope angle decreased. We did not dig on this aspect but were able to ski cut the top of the bowl with no results before skiing.

Region

Bridger Range

Location (from list)

Argentina Bowl

Observer Name

Zach Tondre
