

# Hyalite

Date

Sun, 01/23/2022 - 12:10

We skied into maid of the mist, dug a pit on a northwest facing slope at about 9800ft and found half the pack was facets. We got ECTP 21, and retooled. While on the ridge line on the way up we trigger many small wind drifted pockets.

Region

Northern Gallatin

Observer Name

Alex Palombo
