

Surface hoar in Cooke City

Date

Fri, 11/25/2022 - 08:30

Activity

Skiing

Well developed surface hoar was widespread this morning near Cooke City. The strong sun burned it off on aspects that received sun, but it was preserved in shaded areas. Strong south winds picked up in the afternoon in the Sheep creek drainage. We dug two pits (each both times) and a shovel shear test just below sunset peak, and found stable snow.

Region

Cooke City

Location (from list)

Sheep Creek

Observer Name

Nicholas Salsburg
