

Large collapses in the Bridgers

Date

Sun, 01/21/2024 - 15:00

Activity

Skiing

Toured out the gate of Bridger Bowl north of Texas meadows. Walking up through the flat meadow we got 10 or so small whumphs and 3 large booming collapses. No remote triggers on the steep terrain above were observed. Snowpit from where the large collapses were triggered is attached.

Region

Bridger Range

Location (from list)

Texas Meadow

Observer Name

Charlie Bayles
