## **Collapse Near the Sphinx**

Date Sun, 03/31/2024 - 17:15 Activity Snowboarding

From email: We were out camping around the east side of Sphinx Mountain. We rode sleds over dirt for a while and came from Buck Ridge. We didn't see any fresh avalanche crowns all weekend. We did get a big whoomph that collapsed the snowpack while skinning along a ridgeline on Sphinx that seemed freshly loaded. Cracks shot out maybe 25 feet around, but it didn't move. We didn't dig snow pits; we followed our plan of keeping our terrain selection on the mellow side.

Region Northern Madison Location (from list) Sphinx Mountain Observer Name Tom Grande
