

Storm slabs on the Ramp

The Ramp

Bridger Range

12/30/2024

Code

SS

Latitude

45.82880

Longitude

-110.93100

Notes

Toured up the ramp at around 4 yesterday, snow was still falling heavily. Counted 4 or 5 natural storm slabs breaking mostly within the new snow. A skier before us triggered a [slide](#) in the chutes on a [ski cut](#). I struggled to find a clean interface where the storm slabs were breaking on a few hand pits, mostly just a lot of fresh snow.

Number caught

0
